WHEN SOMETHING LOOKS WRONG

For everyone — Boulangerie Kim's

First rule

You will never break anything by pausing the workflow.

If you are unsure, pause it and call Geofrey A paused workflow is safer than a wrong one.

Symptoms and what to do

Symptom (in your words)	Check first	Then
"Customer got no confirmation"	Open n8n — is the workflow Active?	If not active, click Activate. If active, c Gam Geofrey
"Order missing from sheet"	Check the Review tab	Add manually, mark HANDLED, then Geofrey
"Wrong confirmation sent"	Check the original WhatsApp message	Apologise to customer, note in sheet call Geofrey
"System sent nothing all day"	Open n8n — check error log	Call Geofrey immediately
"Too many orders in Review"	Open Review tab	Handle them manually, call Geofrey v details
"Customer complains about language"	Check the message	Note it, call Geofrey

---

How to check if n8n is running

1. Open [n8n URL]
2. Log in with the credentials [Your Name] gave you
3. Look at the workflow named "WhatsApp Order Flow"
4. If the toggle at the top right is **green/on**, it is running
5. If it is **grey/off**, click it to turn it on

When to call Geofrey

Call immediately if:

- The workflow is on but nothing is happening
- You see a red error in n8n
- A customer is angry about a missed order
- The Google Sheet is not updating

Do not try to fix the workflow yourself. Just pause it and call.
